Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2837

1. Claim 1 is objected to because of the following informalities: "the foot portion" (line 8) lacks antecedent basis. Appropriate correction is required.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Coles (133,520) in view of Steinhilber (5,282,427).

Regarding claim 1, Coles discloses an anchor apparatus comprises a base unit (c) comprising a generally thin flat base member having a top surface and a bottom surface (Figs. 1 and 2), a capture unit including a raised wall member (a) projecting upwardly from the top surface of the base member wherein, the raised member is provided with a vertical opening dimensioned to receive a foot portion of an appliance (this anchor apparatus can certainly be used for musical instrument stand).

The difference between Coles' apparatus and claim 1 is that claim 1 recites the bottom surface is provided with a hooked portion.

Steinhilber teaches a bottom surface (30) of a support column (14) provided with a hooked portion (22) for anchoring to the carpet floor. It would have been obvious to one having ordinary skill in the art to modify Coles' apparatus as taught by Steinhilber to

include the bottom surface is provided with a hooked portion for the purpose of anchoring to the carpet floor.

Regarding claims 2-5, Coles discloses the claimed invention..

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shih-yung Hsieh whose telephone number is 571-272-2065. The examiner can normally be reached on 7:00-3:30.
